

## GKM After-Sales Service

Even after the purchase of your machine, it is still our goal to ensure that it operates perfectly. A trouble-free production process is an absolute precondition for the economic success of your company. For commissioning, maintenance and / or optimization of your existing screening plant (irrespective of the manufacturer), our qualified and experienced service technicians are on site at short notice. Our extensive replacement and spare parts warehouse guarantees a fast delivery to avoid downtimes.

### Optimization

#### You would like to improve and optimize your screening machine?

The first step is to analyze the actual situation. Afterwards, we make suggestions for optimization.

#### Your main benefits includes...

- Increased capacity
- Cost Reduction
- Maximum screening efficiency
- Longer machine availability
- Reduction of set-up times
- Reduction of wear of balls, brushes, flexible hoses, screen inserts
- Reduced mesh blinding

Before

### Maintenance Contracts

#### Your machine is in continuous operation?

Then regular maintenance should be done. For this we offer routine maintenance agreements

#### Your main benefits include...

- Maintenance of your screening machine for set periods of time
- Fixed price guarantee without price surprises
- Priority appointment
- Detailed maintenance protocol
- Offer and fast delivery of the spare parts recommended by our technician

After

### Overhaul / Refit

#### Your tumbler screening machines is operating for many years and you're considering a refit?

We will provide you with a professional GKM report and offer you an individual solution plan.

#### Your main benefits includes...

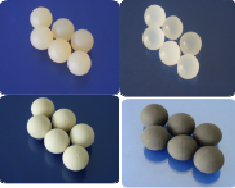

- No unscheduled downtimes
- Predictable time frame
- Explicit cost controlling
- Professional Overhauling by experienced Service-Technician

## Spare Parts, Wear Parts and Screen Remeshing Service
